Directors Profile

**Ms. Deepa R,
Director**

Deepa started her career as a student executive counsellor in Vinayaka Mission's Research Foundation – Deemed to be University (VMRFDU) at Tamil Nadu. Her 16 years of spanning success in this department have deepened her understanding, and she was the head of the Admission Department in VMRF. She has positioned herself as an instrumental part of the astonishing growth that VMRF has witnessed in the past decade. She has always believed that education is the only tool to change the present and create a future. Thus, Ms. Deepa, with her dedicated team, has travelled across India all these years, creating awareness on the value of education, women education and women empowerment. She has helped students of financially unstable backgrounds and rural areas pursue their education in India and abroad through career counselling, scholarships, acquiring bank loans, and aiding them to access the opportunities provided by the government based on their interest, need, and merit. With her extensive knowledge, experience, and portfolio of accomplishments in the field, Ms. Deepa and her dedicated team are all set to face new challenges in medical and engineering education admission in Asian countries in the coming decade.

Avinash is a dynamic personality with a vision to provide medical education assistance to ambitious students with a dream to prove themselves in the field of medicine. He owns a deep 21 years of experience as an education consultant and in the field of academics and administration. He started his career as a consultant for engineering education and moved on to medical education. He worked as a prominent consultant for more than 30 universities across the country, empowering the lives of thousands of students. His counselling and guidance have helped several students to proceed with their careers successfully. Avinash's will be incomplete if his generous contributions and helping attitude towards economically backward students through scholarship and counselling support is not mentioned.

**Mr. Avinash K,
Director**

Aieraa Overseas & PCTU

On the evening of October 28, 2023, Phan Chau Trinh University signed a memorandum of understanding for medical education cooperation with Aieraa Overseas Study (India). The signing ceremony was attended by Dr. Nguyen Huu Tung, the University President, Ms Deepa, Managing Director Aieraa Overseas, Mr. Avinash Director Aieraa Overseas as well as the leadership of the University and representatives from Phan Chau Trinh University, along with representatives from Aieraa Overseas Study India. Both parties are hopeful that this marks an important beginning for a sustainable partnership in training highly skilled medical professionals.

About The University

Fully equipped with modern machinery and equipment; laboratory system to meet the requirements of learning and scientific research for students.

**Meets the Requirement Specified in
National Medical Commission
(Foreign Medical Graduate Licentiate) Regulations,
Dated 18th November 2021.**

India & Vietnam

India and Vietnam, with historical roots in their national struggle for independence, share traditionally close and cordial bilateral relations that are categorized as comprehensive strategic partnership by both countries. Nearly 6000 persons from India, including short-term visitors, constitute the Indian community in Vietnam. Most of the Indian community members are professionals employed in business and trading companies and sectors such as IT, hotels/restaurants, mining, yoga institutions, civil aviation and schools. Indian businesses such as ONGC Videsh Limited, Bank of India, Bharat Electronics Limited, HCL Technologies and a few others has presence in Vietnam. India and Vietnam governments are working together in various developmental projects.

Why PCTU?

SPECIALLY CURATED SYLLABUS FOR INDIANS STUDENTS:

Highly focused on providing Practical Training in Hospitals while learning the same in Class room starting from first year. Phan Chau Trinh University has access to the Hospital right at the beginning of their enrollment without waiting until two or three years later. This helps students increase their internship time to 70 to 80% of their 6-year study period.

MODERN INFRASTRUCTURE: Well Equipped Classrooms, Fully Equipped Laboratories, Libraries, Modern 2 D & 3D Simulation Clinics and Sufficient Number of Cadavers.

BEST IN CLASS MEDICAL MUSEUM : The specimens housed in this museum allow students to appreciate the complex relationships of organs and structures in more detail than textbooks could provide.

INDIVIDUAL ATTENTION: Student and teacher ratio is 5:1 which enables students to get individual attention and guidance from their teacher.

TRAINING: From the first day of their course, the students receive instruction and training on handling patients effectively after passing a Test for stimulation. This is the pioneer institution to provide training in handling patients .

PIONEER IN STIMULATION HOSPITALS: The only institution with stimulation hospitals for training students from the moment of enrollment is our university . Typically, hospitals just have stimulation centers. To be eligible for training, you must pass the stimulation test.

INTERNATIONAL FACULTIES: The international faculty members will provide valuable exposure to further enhance the quality of education for students.

Why PCTU?

ADDITIONAL BENEFIT FOR STUDENTS: While the university's dean is German, a special vocabulary training in English has been initiated by the university will help them score 6.5 on the ielts exam and gain exposure to a worldwide audience. to help students learn English more effectively.

OWN HOSPITALS: PCTU is aligns owning nine hospitals spread around Vietnam that the university owns and has more than 1500 beds, the increased patient flow would improve student training in all specialty areas of medicine.

CADAVER: provides More than ten cadavers are provided by the institution to help students learn all aspects of medicine from the first day of their courses. Owing to these amenities, broadened perspectives, and distinctive teaching techniques, the university stands out on the list.

TRULY INTERNATIONAL EXPERIENCE: PCTU is hosting international students for clinical internships at the university's affiliated hospitals and teachers around the globe as a part Student - Faculty Exchange programs. This model represents a significant advantage for international students to experience clinical rotations, practical internships, and gain exposure to disease models and healthcare practices in Vietnam. It also fosters cultural exchange among students from different countries.

LINKING SCIENTIFIC RESEARCH AND CLINICAL PRACTICE: The University has established the Biomedical Research and Application Center (BMTAC) with modern equipment, not only meeting the needs of teaching but also applied research. Molecular biology technologies help support clinical diagnosis and treatment.

During the internship students are able to practice at Phan CHAU TRINH University Hospital and TAM TRI Medical group's General Hospitals. Which are equipped with modern medical technology and especially the source of patients at the hospital, helping students have the conditions to be exposed to a professional working environment, which is a good premise for developing professional skills for future jobs. Students can do Internship in 09 Multi-Specialty Hospitals.

Teaching Hospital

Teaching hospitals are where medical students can clarify their theoretical knowledge. As well as testing their clinical skills and expressing any concerns through the direct interaction with patients in a real hospital. PCTU & Tam Tri medical group have designed training programs with sufficient time for hospital practice, and they offer opportunities for students to train at seven different Tam Tri Hospitals and PCTU's Hospital located on campus.

This is the perfect opportunity compared to any other medical universities in Vietnam. Other universities may struggle to provide a stress-free environment and opportunities for students to engage in realistic career practices. The university genuinely desires to create opportunities for students to practice throughout their learning here at PCTU. The university also focuses on developing students' foundational knowledge and core subjects. Furthermore, in-depth researching skills in order to bring the community the best methods of precise diagnoses, treatment and healthcare.

TAM TRI DA NANG GENERAL HOSPITAL

It is located in the most livable city in Viet Nam. Tam Tri Da Nang Hospital has a capacity of up to 200 beds and receives about 600-700 visits every day.

The hospital accumulates a few strengths such as laparoscopic nephrectomy, thyroid cancer surgery, and endoscopy procedures for umbilical hernias. Extraordinarily, the hospital is invested with many equipment including CT scanner, digital X-ray machine, 4D ultrasound machine, and other endoscopic instruments. One of the unique equipment is the 128-slice CT scanner, which has the ability to accurately diagnose all the cancer stages with key of speed, accuracy, effectiveness being the cue to diagnose and treatment .

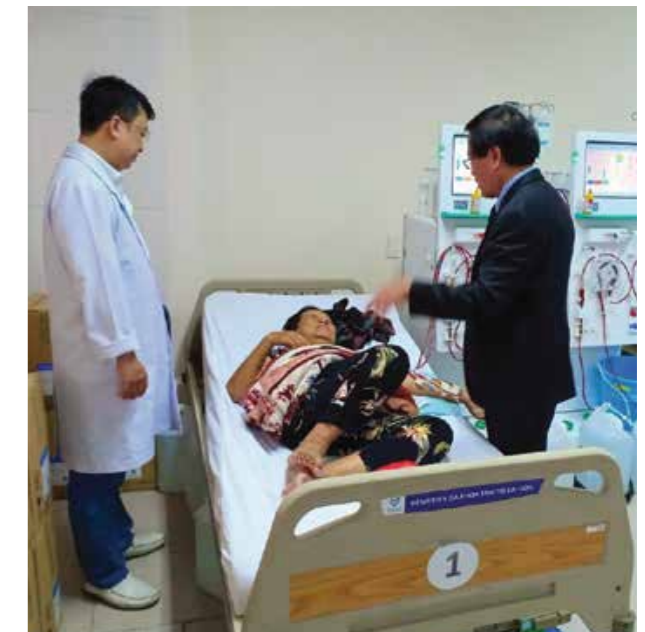

TAM TRI NHA TRANG GENERAL HOSPITAL

It is located in the most popular beach city in the world and 35 km (21.7 miles) away from Cam Ranh International Airport. Tam Tri Nha Trang Hospital has a capacity of 200 beds and operates based on the model of an internationally accredited hospital. Since the flourishing development of tourism in Nha Trang, the hospital has a separate international medical department to assure examination services for foreign patients. In 2022, a Center of Obstetrics and Gynecology and in Vitro Fertilization (IVF) was established, this is the first obstetrician and infertility unit in Khanh Hoa. Besides some available services such as cesarean delivery, normal delivery, postpartum service, newborn care. The center is also developing several new services including Intrauterine Insemination (IUI) and In Vitro Fertilization.

TAM TRI SAI GON GENERAL HOSPITAL

Tam Tri Saigon Hospital is located on the main street of the western gate of Ho Chi Minh City. With only 12 km or 7.4 miles from the city and 10 minutes at most to Tan Son Nhat airport by car. The hospital has accommodated up to 150 beds and offers quality and diverse medical services. Simultaneously, the hospital is focusing on improving the dialysis unit and endoscopic lithotripsy. On average, the hospital receives dialysis for 250 kidney patients per year utilizing 30 machines. The dialysis service operates in five shifts per day, allowing for a total of approximately 25,000 dialysis sessions to be conducted each year.

TAM TRI DONG THAP GENERAL HOSPITAL

It is located in Cao Lanh City, which is in the center of Dong Thap province. The province is situated in the northern part of the Mekong Delta region and shares a border with Cambodia. Tam Tri Dong Thap Hospital has 200 beds, 7 operating rooms, and 21 examination rooms. Receive over 1,000 patients daily. The strength of the hospital is to develop a modern subclinical diagnostic center for early disease screening. Numerous medical services with elevated technology such as PRP stem cell injection in the treatment of osteoarthritis, laparoscopic, surgery, Longo hemorrhoid surgery, Phaco eye surgery, and artificial Kidney dialysis.

TAM TRI HONG NGU GENERAL HOSPITAL

Tam Tri Hong Ngu General Hospital is located in Hong Ngu City. This is a border city near two international gates: Thuong Phuoc and Dinh Ba, along with a number of Cambodia indirect sub-border gates. Tam Tri Hong Ngu General Hospital is equipped with state-of-the-art medical equipment and technology, enabling it to provide advanced medical care services. With these resources, the hospital can meet the healthcare needs of the local population without the need for patients to be transferred to higher-level facilities. The hospital aims to expand these specialities: Pediatric, Surgery, Obstetrics, Paediatrics, Otolaryngology, and Dentomaxillofacial.

TAM TRI CAO LANH GENERAL HOSPITAL

It is located in Cao Lanh City, which is in the center of Dong Thap province. The province is situated in the northern part of the Mekong Delta region and shares a border with Cambodia. Tam Tri Dong Thap Hospital has 200 beds, 7 operating rooms, and 21 examination rooms. Receive over 1,000 patients daily. The strength of the hospital is to develop a modern subclinical diagnostic center for early disease screening. Numerous medical services with elevated technology such as PRP stem cell injection in the treatment of osteoarthritis, laparoscopic surgery, Longo hemorrhoid surgery, Phaco eye surgery, and artificial Kidney dialysis.

PCT MEDICAL UNIVERSITY HOSPITAL

Phan Chau Trinh University's Hospital is in the process of providing up to 300 beds with the latest technology. Students have internships at big hospitals and are guided by professors, PhDs, and doctors who possess numerous clinical experiences. Additionally, excellent facilities and modern medical techniques are offered here as well. This helps students to have full access to a professional working environment, and a good premise for career skill afterwards.

Phan Chau Trinh University's Hospital is built on campus, expecting to meet the expectation of over 2,000 to 3,000 visits every day after beginning its operation. This is a modern hospital with the direction of a digital hospital in specialty and administration. It is designed harmoniously between aesthetics and functionality.

The Hospital will be fully equipped with the latest technologies supported by AI, which means digital diagnostic techniques on a consolidation with artificial intelligence (AI). For instance, multi-slice CT Scanner system, magnetic resonance imaging (MRI), Digital Subtraction Angiography (DSA) and a series of diagnostic imaging systems and advanced tests.

The hospital utilizes a smart information system for both medical operations and hospital administration, according to the 4.0 technology. Therefore, the hospital also contributes to achieving the goal of training medical graduates who are prepared to work in advanced medical examination and treatment facilities.
